## CONDITIONS FOR SALE

## PART I.—GENERAL

The prices shown in the above Schedule and the other provisions relevant thereto as set forth below, shall come into force with effect from the date on which they are published in the *Gazette of India* and notwithstanding the rates at which an order has been booked and/or the materials paid for, shall apply to all deliveries effected on or after that date. In all cases where delivery is effected by rail, the date of the Railway Receipt shall be deemed to be the date of delivery.

2. To arrive at the base prices for places other than Calcutta, Bombay, Madras, Tatanagar and Burnpore the Place extras given in the Freight (Place extra) List at Appendix I, are to be taken into account in the manner indicated in the 'Special Conditions' below :

For any place not included in that List, the Place Extra will be determined with reference to the actual railway freight from the nearest of the above five ports except that for places which are not within 250 miles of the 'Ports' of Tatanagar or Burnpore, the Place Extras will be determined with reference to the three ports of Calcutta, Bombay and Madras. In any dispute regarding the Place Extras, the decision of the Iron and Steel Controller shall be final.

3. The base prices adjusted for place extras are for standard lengths and sizes and are subject to the extras and differentials shown in the Extras List at Appendix III.

4. Prices for tested materials apply only where a copy of Test Certificate recognised by the Government of India is supplied with the materials.

Tested materials must be within the tolerance specified ; untested materials must be within the usual commercial tolerance.

5. The chargeable weight in cases of Bars (1/2" and over), Structural, Plates and Rails is <sup>1/2</sup> Sectional weight and in cases of Rods (below 1/2"), Semis, and Sheets is Actual weight. In the case of materials sold on sectional weight to a tested specification which allows only a plus tolerance (e.g., Boiler Plates) the chargeable weight will be the theoretical weight plus half the tolerance.

5(a). The weight tolerance admissible for untested materials is plus/minus 4% and for tested materials plus/minus 2 1/2%. In case the Railway Receipt weight (actual) weight of such materials as are chargeable on the basis of sectional weight is within the above prescribed weight tolerances (except in case of those tested materials which allow only a plus tolerance e.g., Boiler plates) the sectional weight should be accepted as correct.

## PART II.—SPECIAL CONDITIONS FOR SALES BY REGISTERED PRODUCERS.

1. Where, in accordance with the conditions of sale, sales are made f.o.r. destination by a Registered Producer, the rates shown in Column I above adjusted by adding the place extra for the destination apply to all such deliveries in wagon loads, irrespective of whether the materials are sent under M. C. Note or R. M.C. rate. Where wagons are not fully loaded the customers shall pay the difference between the actual freight per ton and the amount of freight per ton which would have been incurred if the wagon had been fully loaded. Where, in accordance with the conditions of sale, sales are made by a Registered Producer ex-works or f.o.r. Seller's Siding, the rates in Column I above adjusted by adding the Place Extra for the place in which the works are situated, shall apply to such sales. Sales in wagon loads by the Main Producers will normally be effected f.o.r. Destination and sales by Registered Producers other than Main Producers will normally be effected ex-works or f.o.r. Seller's Siding. A list of Registered Producers is given below.

2. For deliveries by rail in 'smalls' by the Main Producers the sale should be made f.o.r. Despatching Station and the base rate shall be adjusted by adding the Place Extra for the Despatching Station. In such cases the actual freight must be borne by the buyer.

3. If materials sold f.o.r. Destination are at the Customer's request despatched by a route other than the cheapest, the difference in freight will be borne by the customer.

4. Octroi, Sales and other taxes incurred in the process of delivery of materials from Seller's yard or Siding to customer will be borne by the latter.

5. All sales to Controlled Stockholders by all Registered Producers including the Main Producers will be made at f.o.r. destination prices and will apply to deliveries at the Stockholders' siding, if any, or to his nearest Railway Station.

6. In respect of supplies to consignees in the Dominion of Pakistan on f.o.b. Calcutta basis, extra charges (exclusive of any duty or tax payable under any law for the time being in force) as fixed by the Controller, in consultation with the Steel Price Negotiations Committee, from time to time, will be payable. This extra charge has been fixed at Rs. 20/- per ton for the time being.

Siding* or into workshops adjoining Stockholder's yard. For such sales the charges incurred for loading the steel in the wagons or lorries should be borne by the Controlled Stockists. Where delivery is undertaken by Controlled Stockholder at the request of the buyer, delivery charges shall not, except by special arrangement between the stockholder and buyer, exceed the following rates :—
